Fueling the Future of Mobility
Society of Automotive Analysts
Mobility Innovations Summit
October 17, 2019
The economic and societal benefits offered by AVs in a single year of widespread deployment will dwarf the cost to workers incurred over the entire multi-decadal deployment of AVs when measured in purely economic terms. The benefits of AVs are sufficiently large to enable investment of adequate resources in assisting impacted workers.
100,000 new mobility jobs will be created in the next decade.
